Reasons for Allowance

The following is an examiner's statement of reasons for allowance: European Publication Number 0272 911 A2 and U.S. Patent No. 6,418,256 B1, provided by the applicant(s), are exemplary embodiments of the closest available prior art. Both references disclose first and second mode converters with a multimode fiber coupled there between. Both references also teach propagating a first mode and a second, higher order mode. See, for example, the front page of the European Publication and the front page of the '256 patent. However, neither reference teaches or suggests arranging or coupling the second mode converter in such a manner that the first and second signal modes interfere to create a selected spectral spacing at the outlet of the second mode converter as recited by independent claims 1 and 10. Furthermore, no additional teaching is available so as to render the claims obvious over the prior art of record. Thus, claims 1 to 11 are deemed patentable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
